APPELLANT'S RELATIONSHIP TO PROJECT

Appeal is hereby made to the Building Official for an alternate method/material, or interpretation of, Section 608.5 and 508.5 of the Uniform Plumbing Code as adopted by the City of Tucson.

Water Heater temperature and pressure relief valve (tprv) discharge line is to be extended at a downward angle to the exterior of the building. Discharge from a relief valve into a water heater pan is prohibited.

Explanation of why conformance with the above requirement on the project presents an unusual problem. (Use attachment if necessary)

Existing water heater is located in an interior closet and away from exterior walls. There is no ready access to the outside without either trenching the floor or relocating the water heater.

State specifically what is proposed in lieu of literal compliance:

A tprv discharge line shall be run to a metal drip pan located under the water heater.

Owner accepts and understands that if the water heater or tprv malfunction extensive water damage could result.

Owners signature if appellant is other than owner
